

# ISO CONSULTANCY IN INTEGRATED MANAGEMENT SYSTEMS

• **‘Controlling cost’** is the intricate challenge that any organization faces in today’s competitive and complex business scenario. It is true for all the organizations, irrespective of their size, type of products handled or services rendered, nature of organizations such as professional or nonprofit organizations.

• Thus, organizations put in all possible initiatives and efforts to curtail the cost at all possible levels and areas. However, pitfall is that some of the organizations tent to cut corners hampering their operations, resulting into decline in customer satisfaction levels and losing business in the long run.

• Some organizations understand that all type of ‘Waste’ contribute to high level of cost. These costs arise due to repeated inefficiencies or errors in operations at all levels resulting into external and internal failures, reworks, higher inventories, higher receivables, delayed deliveries. Organizations attribute these costs to inefficient and ineffective internal processes, lack of or incorrect measurements for process performance as well as lack clear responsibility and accountability.

• Precise option that the organization may have is to opt for effectively implement international management system standards. These include Quality Management System (ISO 9001:2015), Environmental Management System (ISO14001:2015), OHSAS 18001:2007 and so on....as per nature of operations.

# *SAFETY GUIDELINES*

**ISO 9001:2015 is the latest standard for Quality Management System.  
Important elements of the standard are:**

## **Risk Based Thinking**

† Systematic identification and prevention of business risks.

## **Process Approach**

† Remapping of processes with process corrections, covers all the functions, determination of process inputs and desired outputs, inter-linkage of processes, assigning responsibilities.

## **Compatibility with the strategic direction**

† Align Management systems to Organizations strategic direction. This helps organizations to achieve its strategic objectives.

### SMART Objectives

- Establish measurable or track able objectives in their operations, where performance needs to be monitored and enhanced. Determining such parameters and appropriate measurable parameters helps organizations to monitor its performance. The specific structured management programs ensure that the SMART objectives are achieved taking the organizations to the next level.

• Environmental Management system in accordance with ISO 14001:2015 prescribes systematic identification of 'waste' which indicates inefficient utilization of resources. Organizations see this waste as 'cost'. Elimination or minimization of this waste, not only reduce cost but also minimize environmental impacts.

• Implementation of safety systems in accordance with OHSAS 18001:2007 ensures systematic assessment of risks, identification of hazards and its mitigation. Enhancing safety in organization especially on the shop floor promotes productivity. Needless to state that prevention saves major costs in the long run.

Blue and Green Solutions will be very happy to assist your Organization in implementing these management systems very effectively. Our approach is to align or realign the processes in the organization as appropriate to nature of work, size and specific requirements of your organization.

Our consultants ensure that the systems are sleek, non-bureaucratic, easy to understand and implement.....effective and efficient at the same time. Our expertise includes seamless integration of these management systems, which is important for effective and efficient implementation.

### Our team strongly believes that

- Effective systems can be built only if employees are clear about the concepts of these systems. Importantly, how implementation of these systems is beneficial to organisation in cost reduction or enhancing customer satisfaction. Thus, system related training is given lot of importance.
- It is important to measure or track performance of management system implemented in the organization. Hence, our consultants assist organizations to establish objectives in the right areas with appropriate measurable parameter.
- 'Internal audits' is a very powerful tool to ensure systems remains effective. Hence, a team of internal auditors will be trained to make the audit process more effective.
- Timely reviews are important to ensure desired performance of Management Systems, supported by action plans as appropriate.

- Our consultants draw a comprehensive roadmap for the assignment. This ensures timely completion of the assignment.
- Hence, implementation of the International standards will take the Organization to the next level if implemented effectively. This will not only reduce cost, enhance customer satisfaction but also systematically assess risk, mitigate the same and improve on the opportunities identified.
